Economic Commentary and Market Review - November 2017

The market ended in correction at the end of the month owing to profit booking after peaking to record high levels (10,490 for Nifty and 33,865.9 for Sensex) at the beginning. The optimism was mainly driven by data indicating sequential improvement in GDP growth, Moody's sovereign rating upgrade, and government's announcement of recapitalizing plan for public sector banks to the tune of Rs.2.11 lakh crore.

Real estate was the top gainer during the month after approval of Central cabinet for increase in carpet area of houses eligible for interest subsidy under the Credit Linked Subsidy Scheme (CLSS) for the middle income group under Pradhan Mantri Awas Yojana. It was followed by Media mainly due to positive impact from Zee Entertainment. Pharma was the worst performing sector in the month mainly due to FDA issues at Lupin. It was followed by Metal due to correction led by slowdown in China affecting the demand outlook in the sector.

FII's continued to infuse capital investing about Rs.20,000 crores into domestic equity market in November. They remained net buyers in the debt market as well but at a lower level of Rs.530 crore in November compared with roughly Rs.16,000 crore in October. Mutual funds industry continued to support the market, buying nearly Rs.11,000 crores into equities and over Rs.37,000 crores into debt in the month.

At their latest meeting, the RBI left interest rates untouched at 6%, citing upside risks to inflation. The Monetary Policy Committee (MPC) once again raised its inflation target to 4.3-4.7% from 4.2-4.6% for the second half of this fiscal year due to continued increase in crude oil prices and implementation of HRA by States. The MPC left its real GVA growth forecast for FY18 unchanged at 6.7%.

Per government data, India's gross domestic product (GDP) grew to 6.3% in the second quarter ended September 2017 from 5.7% recorded in the previous quarter. However, India's fiscal deficit at October-end stood at 96.1% of the budget estimate for FY18, mainly due to lower revenue realization and rise in expenditure. This compared with deficit at 79.3% during the same period last year. In absolute terms, the fiscal deficit stood at Rs.5.25 trillion during April-October of FY18. The government aims to bring down the fiscal deficit to 3.2% of GDP for FY18 compared with 3.5% in the last fiscal year.

Corporate earnings in the second quarter of FY18 improved compared to first quarter of the same, raising hopes of impending economic recovery. In the second quarter, aggregate operating and net profit (based on 2,639 companies that have declared results) grew 5.74% and 5.33%, respectively. This compared with a 3.85% and 1.14% fall in operating and net profit, respectively in the first quarter of FY18. The turnaround in corporate earnings is expected to be stronger in the second half of FY18 owing to increased demand on the back of waning impact of demonetisation and implementation of GST.

Sector outlook

Banks and NBFCs

The banking sector, mainly the PSU banks, was favourably impacted by government's Rs.2.11 lakh crores recap plan announced at the end of October. However, most PSU banks and some corporate-focused private sector banks posted weak second quarter results due to higher NPA levels and stress in the telecom sector. Nevertheless, Moody's sovereign rating upgrade for India to 'Baa2' with a stable outlook is expected to be positive for the Indian financial sector, which is a proxy to country's economic growth.

Information Technology

The IT sector continued to do well due to persistent pressure on rupee against the greenback. There could be downward pressure on rupee in the near future as well due to rising crude oil prices resulting in widening trade deficit.

Pharma

2Q18 earnings of the pharma companies were mixed with domestic sales recovering post GST related destocking in the previous quarter. Sales in the US market recorded de-growth owing to higher price erosion in base products, delay in approval of key products, increased competition and customer consolidation. Supply disruptions due to some plants being out of action because of unfavourable observations by the US FDA also impacted new product approvals. However, valuation of the sector looks attractive over the long term despite near term headwinds.

Automobiles

Automobile stocks fell marginally as since October and post the festive season, demand came down and dispatches reduced as dealers cleared inventory. Domestic passenger vehicle sales declined marginally to 2,79,837 units in October from 2,80,677 units in the same month last year, per the Society of Indian Automobile Manufacturers. Car sales went down 5.32% while motorcycle sales dipped 3.50% during the month.

Oil and Gas

Oil stocks fell as OMCs were impacted by rising oil prices (Brent crude was \$63.57 a barrel at month-end, up 5% from \$60.49 at the beginning of the month) mainly due to agreement between OPEC and non-OPEC producers led by Russia to extend oil production cuts until the end of 2018 at their Vienna meeting. However, gas-based stocks such as GAIL were positively impacted by higher crude oil prices and higher domestic production.

Cement

Increased government spending on infrastructure is expected to boost the demand for cement post monsoon coupled with recovery in sand availability. Further, upcoming assembly elections in next 12-18 months will also drive demand in coming months. Demand is yet to pick up convincingly as relentless sand crisis and persistent slowdown in real estate activities post RERA remained major headwinds. Sales volume of cement companies are expected to be strong in current month due to calendar year closing, pick up of rural volume after harvesting activities, and improving sand availability in UP and Bihar.

Metal

Metal stocks moved southward due to increasing concern for slowdown in China clouding the demand outlook for metals. The Chinese government intends to shutdown polluting industries and bring more financial prudence in lending to infrastructure projects. This is expected to decelerate economic growth and lower the consumption of metals.

Conclusion

There is limited downside potential for Nifty backed by robust inflow from institutional investors. Several factors such as smooth implementation of GST, resolution of banking system NPA, and revival of investment cycle would decide the future course of the market.

Return of Shriram Equity & Debt Opportunities Fund in November stood at 12.11% CAGR (since inception) accompanied by lower levels of volatility. Amidst volatility and short term uncertainties, we try to achieve stable risk adjusted return based on fundamentally sound and good quality stocks. In this backdrop, retail investors would do well by maintaining their exposure to equity and equity oriented hybrid funds such as Shriram Equity and Debt Opportunities Fund through regular systematic investments as this asset class has a consistent track record that will outpace price inflation.

[^]Past performance may or may not be sustained in future. There is no assurance or neither guarantees to Unit holders as to rate/quantum of dividend distribution nor that will the dividends be paid regularly. All dividends are on face value of Rs. 10 per Unit. After payment of the dividend, the per Unit NAV falls to the extent of the payout and statutory levy, if any.

Performance of Scheme:**Shriram Equity and Debt Opportunities Fund**

Returns of Regular Plan - Growth Option as on September 30, 2017						
Date of inception: 29-Nov-13.						
NAV as on 30.09.17 Rs. 15.3238						
Date	Period	NAV (Rs.) Per Unit	Scheme Return % (Annualized)	Benchmark Return % (Annualized)	Value of Investment of Rs.10000	
					Scheme	Benchmark
Sep 30 2016	Last 1 Year	14.0329	9.20	11.95	10,920	11,195
Sep 30 2015	Last 2 Year	13.1127	8.09	10.58	11,686	12,231
Sep 30 2014	Last 3 Year	12.2098	7.86	8.17	12,550	12,667
November 29 2013	Since Inception	10.0000	11.76	12.17	15,324	15,545

Past performance may or may not be sustained in future. The returns are Compounded Annual Growth Returns (CAGR) for periods since Inception and absolute for 1 year and simple annualized for less than 1 year. Performance of dividend option would be Net of Dividend distribution tax, if any. Benchmark is a blend of 70% CNX NIFTY for the Equity part of the Portfolio & 30% of CRISIL Composite Bond Fund Index for its investments in Debt and Money Market Instruments. For computation of since inception returns (%) the allotment NAV has been taken as Rs. 10.00. Load is not considered for computation of returns. In case, the start/end date of the concerned period is a non business date (NBD), the NAV of the previous date is considered for computation of returns. The NAV per unit shown in the table is as on the start date of the said period. **Benchmark Index:** 70% of Nifty Plus 30% CRISIL Composite Bond Fund Index. Since Inception returns are calculated 70% CAGR of Nifty plus 30% CAGR of CRISIL Composite Bond Fund Index.

SIP Performance				
	Since Inception SIP	3 years SIP	2 years SIP	1 year SIP
Total Amount Invested (Rs.'000)	460.00	360.00	240.00	120.00
Mkt Value as on Sep 30, 17 (Rs.'000)	553.85	411.27	270.29	128.08
Returns (Annualised) (%)	9.66%	8.84%	11.89%	12.73%
Benchmark Returns (Annualised) (%) #	10.20%	9.66%	12.90%	13.13%

Past performance may or may not be sustained in the future. # Benchmark index is constructed by investing Rs. 70 in Nifty and Rs. 30 in CRISIL Balanced Fund Index on the date of allotment. Assuming Rs. 10000 invested systematically on the first Business Day of every month over a period of time. CAGR returns are computed after accounting for the cash flow by using XIRR method (invest internal rate of return) for Regular Plan - Growth Option. Load is not taken into consideration for computation of performance. The above investment simulation is for illustrative purpose only and should not be construed as a promise on minimum returns and safeguard of capital. The AMC/Mutual Fund is not guaranteeing or promising or forecasting any returns.

HOW TO READ FACTSHEET

Fund Manager

An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription

This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional amount

This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity

The yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs 500 every 15th of the month in an equity fund for a period of three years.

NAV

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the NIFTY, Sensex, BSE200, BSE500, 10-year Gsec.

Entry load

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund.

The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1 %, the investor will enter the fund at Rs. 101. (note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor).

Exit load

Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceed at net value of NAV less Exit load. For instance if the NAV is Rs. 100 and the exit load is 1%, the investor will receive Rs. 99.

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe ratio

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta ratio (portfolio Beta)

Beta is a measure of an investment's volatility vis-a-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

R Squared

It is a statistical measure of how closely the portfolio returns are correlated with its benchmark.

AUM

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.
